Accessing SPS Courses Offline via Moodle
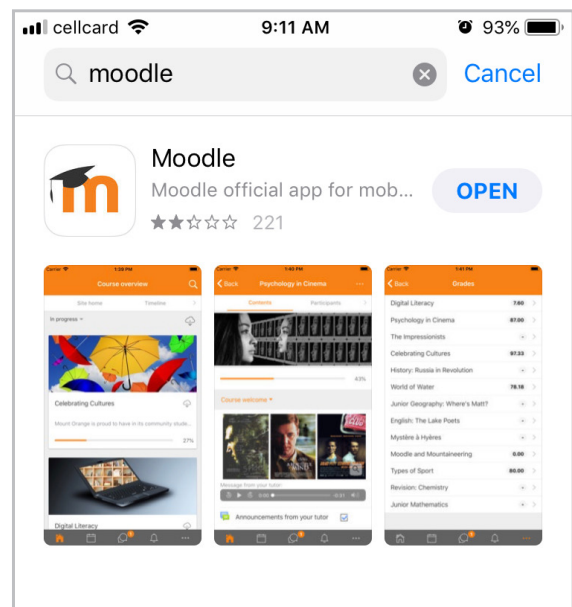

Before You Begin

Before accessing any SPS courses through the Moodle app, you must have created an account on www. spscourses.com through your browser.

Limited wifi access is necessary to initiate a download of the course to your device, so that it can then be accessed offline through the app.
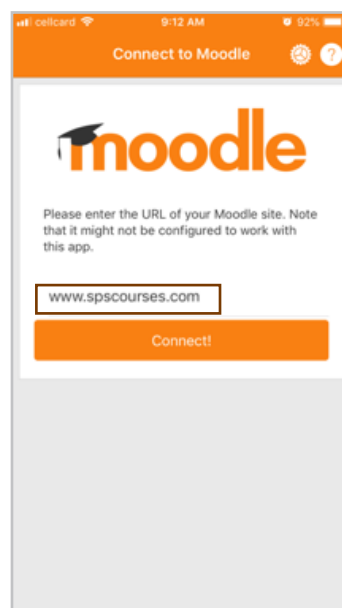

Downloading the App

1. Open the App Store
2. Search for "Moodle"
3. Download the Moodle app as shown to the right.
4. Open the app

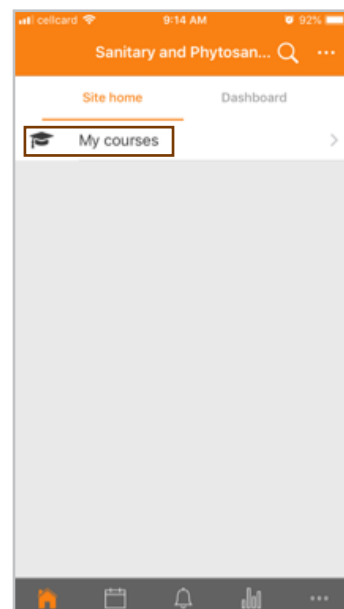

Accessing SPS Courses

5. Type in "www.spscourses.com"

6. Login using your username and password from spscourses.com
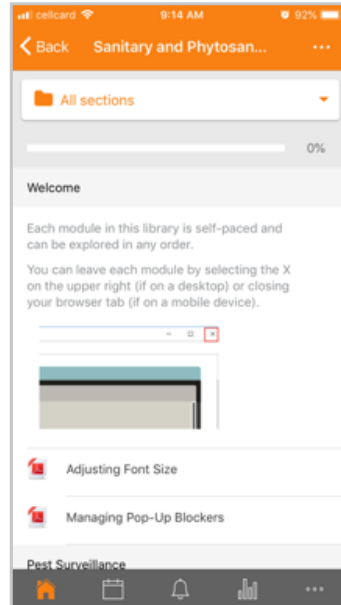

7. Once logged in, select "My Courses".

8. Select the language that you would like to view the SPS courses in:
   - English
   - Spanish
   - French

Downloading the SPS Courses

9. Review all of the activities and offerings within the course.

10. Select your topic of choice and "Begin".

   You must have wifi access to begin the initial download.

11. Once the module landing page opens, click your menu button and select "Download".

   Your course should begin its download.

   Once complete, you should have access to view the content and material in an offline setting.
