Managing Pop Up Blockers

For optimal use of this course pop-up blockers may need to be turned off. From time to time a user may click on a link and it appears nothing happens. Depending on your browser, a closer look will show a small icon in the address bar such as this example from Chrome:

![Chrome Pop-Up Blocker Icon](image1)

or an indicator bar as seen in this example from Firefox:

![Firefox Pop-Up Blocker Bar](image2)

Edge, Safari and Internet Explorer act in a similar way.

Clicking on this pop-up indicator will provide a menu which will allow you to accept pop-ups from the site similar to this image:

![Pop-Up Blocker Menu](image3)

If you need to or prefer to allow pop-ups using your browser settings you can use your browsers Help menu to see the most current instructions by searching for popup.

Below are screen shots of where to find the settings for several common browsers.

**Chrome**

1. From the menu (indicated by three small dots in the upper right of the window), select **Settings**.

![Chrome Settings Menu](image4)

2. From Settings choose **Advanced**.

![Chrome Advanced Settings](image5)

3. From the Advanced window choose **Content Settings**.

4. Choose Popups.

5. Click the ADD link and enter https://moodle.cvm.tamu.edu, then click the ADD button.

3. Enter https://moodle.cvm.tamu.edu in the address bar and click Save Changes.

**Internet Explorer**

1. From the Tools menu, highlight Pop Up Blocker and choose Settings

2. In the Settings window add https://moodle.cvm.tamu.edu and click the Add button.

**FireFox**

1. From the menu choose Preferences.

2. Choose the Content option and Pop-ups Exceptions.
Safari

1. From the main Safari menu choose Preferences.

2. From the menu choose the Security tab and uncheck the Block pop-up windows check box.

Please note you cannot add exceptions, un-checking this box will turn off pop-up blockers for all sites.
